

Magic Square *designed by Henrik Asbjorn*

Magic Square is a shelving system inspired by the children game that is carrying the same name. The Magic Square system offers a variety of playful changes and can be used in office environments, at home or as a display system.

The system is based on the wall mounted panels (1900x380mm) where elements such as boxes, shelves and a worktop surface can be slid in. The panels can be mounted vertical or horizontal, single or as a section covering a hole wall.

Material: Panel CNC milled plywood which comes in different top veneers. The Box is also made from plywood with different top veneers.

Dimension: Panel 1900*380mm. Box 380*380mm

Hula-Hoop *designed by Henrik Asbjørn*

The colored lamp shades rotate like a Hula-Hoop ring around the frosted diffuser. Rotate it in order to change the light effect and appearance of the lamp.

Material: injection molded acrylic, metal base, and compact fluorescent bulb.

Mamba *designed by Henrik Asbjorn*

Mamba is a magazine holder that sneaks up on you. The humors accessory has three pockets and long tail in which you can place newspapers and magazines. The long tail that lays flat on the ground can be used for stacking books or magazines on.

Material: The crawling magazine keeper is made in aluminum and covered in 100% wool. It comes in green, d.

Dimension: 340*800 mm

LightPlay *designed by Henrik Asbjørn*

You can play with the light and take a light play of "four in a row".

The game zone is on an acrylic cylinder and the change of colored acrylic counters changes the light. Just lift up the shade and start all over or "redesign" the lamp. The counters come in 6 different colors.

Material: The shade is made in injection molded or extruded acrylic. The base is die cast aluminum.

Dimension: 280*110mm

Willow *designed by Henrik Asbjørn*

A poetic coat hanger inspired by bamboo and willows. The coats hang on the end of carbon poles which will sway slightly, like wind in the willows. The different weight of jackets will make the appearance change; some jackets will hang low and others high.

Material: A concrete base holds the ultra light 8 mm carbon poles in place.

Dimension: Base 380*380mm. Total height 1850mm.

Stain-less is more *designed by Henrik Asbjørn*

A sleek and organic coffee table made from only one material. The aim was to create a table with a thin, light and fragile appearance meanwhile the actual material makes it very solid and robust.

Material: The table is made of one piece of laser cut 8 mm stainless steel plate. The table is matt on the outside and polished on the inside. The weight of 75 kg makes this table hard to steal, difficult to stain and virtually impossible to break.

Dimension: 750*415*1350mm
